## "My Vavkas in My Village"

**Name- Balu Yashwat Gahla**

**Village - Khomarpada, Taluka - Vavakamgarh, District - Palghar**

**Khomarpada is a small village in the Warlar tribal community located in the Dogarar area. In this village, 90 percent of the people were working in the village to earn a living. One of the main tools of Mirur was Shati, and there was no other tool except Shati. And during the rainy season, fishing was done on the boat at Vasai. For this purpose, during the rainy season, the Makuim families would receive an advance of Rs. 2000. They had to leave the family members alone at Vasai. They were living and living there, but they were getting 300 rupees per day. Of that, 100 rupees was used as a loan and the remaining 200 rupees was brought home. Families used to roam around the village and return to the village on the festivals of Holi, Sira and Diwali. They are not able to communicate with the family because no means of communication is available.**

**I had 2 acres and 20 villages. Babu More Sir of our village said that when I came to the village, I came to the village with them, and they told us, why don't you have the choice of Chagalya Pakar when you have Shatei. They do not have to leave their families to work outside. From this lesson I learned that we should work within our limits.**

Can be digested. But I don't have 60 feet to plant in Shatei. I had a water intolerance problem. I made a decision to plant rice after the instructions given by him. Babu More Saran allowed me to bring 4.5 kg of red kanya seeds and in 2021 I will plant red kanya in padhala. In the rainy season of 2021, paddy cultivation and then red corn cultivation in 9 villages, I asked Babu More Saranya Magisht Keller in my century. In 2021, I will get good results from Kaana, Guar, Bhat Vakamandha.

Names of Wapka	origin	Khach	profit
rice	15,000/-	10,000/-	5,000/-
red ear	80,000/-	35,000/-	45,000/-
Guar	20,000/-	10,000/-	10,000/-
Total	1,15,000/-	55,000/-	60,000/-

During these years, only rice was available during the monsoon season. As the rice farmers did not get good results, I had to go to Bahregavi for work after that. , I have made a profit of Rs.

Along with this, I had 20 cabbages since I was availing the benefits of Mnergea Yointenu Kobadi Shade. And I have 30 Gavarani Kobadi. Pau Kobadishde Neslayamleu Chorer, other tens of hours were happening. It resulted in my chicken farming. Cabbage industry continues to increase the amount of cabbage without increasing the average production in the current situation. In 2022, I will plant pumpkin, rice, kaina, guar.

**I live in the village and live in the village.**

**My main idea is that I am going to start a business by putting fish in the plants of Mannerga Yontenu. , u want to plant apple fruit trees**
